

Damage by respiratory problems

Respiratory problems often manifest in formation of large amounts of slime. The animal will have a decreased oxygen intake, which results in less energy with all the negative consequences. Besides that, mucus is a risky medium for bacterial growth. Therefore respiratory diseases could cause severe economic damage by a decrease in water- and feed intake, production and vitality of the animal.

Aeroforte

Aeroforte is a natural product based on essential oils, which has a positive effect on animals that suffer from breathing problems.

The Aeroforte will shrink the mucus in the respiratory tract. This means that the amount of mucus in the respiratory tract will decrease and the animals will get more air. This way Aeroforte stimulates energy metabolism and feed intake and has a positive effect with heat stress. Aeroforte can be used to decrease reactions of vaccinations.

Product qualities

- ◆ Based on peppermint, eucalyptus and menthol
- ◆ Can be used with respiratory and breathing problems
- ◆ Facilitates the oxygen intake
- ◆ Support during reactions on vaccinations
- ◆ Improves feed and water intake
- ◆ Does not pollute the drinking system

Dosage advice

Aeroforte is easy and quick in its use and can be applied via the drinking system, by spraying or by mist installation. The necessary amount of Aeroforte can be mixed with warm water up to 40 degrees Celsius (or 104 degrees Fahrenheit). Aeroforte is available in bottles of 1 litre.

Poultry

Drinking water system	100-200 ml per 1000 litres of water, during 24 hours, 3 to 4 days
In case of heat stress	100 ml per 1000 litres of water, during 24 hours, 3 to 4 days
Mist installation	1 à 2% solution, sprayed 2 to 4 times per 24 hours
In case of heat stress	1 à 2% solution, sprayed 2 to 4 times per 24 hours
Spray method	2 à 4% solution, sprayed 2 to 4 times per 24 hours
In case of heat stress	1 à 2% solution, sprayed 2 to 4 times per 24 hours
<i>By way of illustration</i>	<i>To spray Aeroforte for 20.000 broilers, 10 litres of solution is needed So 100 to 200 ml Aeroforte is needed to spray for 20.000 broilers once</i>
