

Herb-AI™
LIVER

Plant-based nutrition to support liver health and feed conversion

Herb-AI™LIVER improves conversion from feed into energy and appropriate glucose supply. It also supports the function of the liver, a key organ of the body. This pure herbal mixture can **prevent fatty liver syndrome (FLS)** and **improve protein metabolism**. It also improves the excretion of toxins and metabolites from the body. The active secondary plant compounds of Herb-AI™LIVER promote acylation reactions to facilitate conversion of lipids to phospholipids. Furthermore, they **help prevent hoof and claw issues** in **ruminants** and **monogastrics** and reduce problems linked to inflammation.

GENERAL INCLUSION RATES

Calves:	1 kg / ton of CMR (calf milk replacer)
