Miarom L

Liquid success

Did you know that essential oils have been used to promote health and digestion for over 5000 years? Heat stress, disease pressure and feed changes can all impair poultry performance, resulting in decreased feed intake, failure to obtain optimum physiological benefits from feed and potentially even respiratory problems.

In such situations it is essential to increase feed intake and boost animal well-being.

What does the solution look like?

Miarom L stimulates the appetite and promotes enzymatic digestion. The product additionally promotes good air quality in poultry houses.

Miarom L comprises a special combination of various essential oils. Its long-lasting benefits are obtained from a synergistic, standardised combination of essential oils of thyme, anise, peppermint and eucalyptus, among others.

Miarom L offers the following advantages:

- stimulation of feed intake
- promotion of the secretion of digestive enzymes
- support for the respiratory system
- stabilisation of the intestinal microflora; anti-microbial and physiological benefits of active ingredients

How do I use Miarom L?

Poultry chicks: 100 ml/1000 l water

Poultry: 100 – 200 ml/1000 l water

What are the benefits?

Many years of international customer experience have shown that the use of Miarom L is beneficial in situations such as:

- heat stress
- problems with damp bedding
- respiratory tract diseases
- performance losses

At a glance:

- Miarom L sustainably supports healthy respiratory tracts.
- Miarom L ensures consistent feed intake and thus performance.
- The special composition of Miarom L yields success.

Available sizes: 1 l and 5 l bottles
