

SOLIS[®]
MAX

The effective myco- and endotoxin solution for sustained profitability

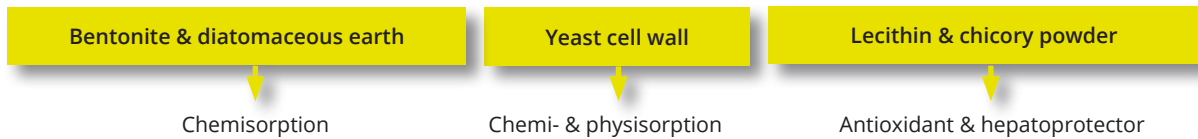

- » Highly effective in protecting animals under mycotoxin and endotoxin challenges
- » Supports health, welfare and performance
- » Reduces the risk of mycotoxicosis

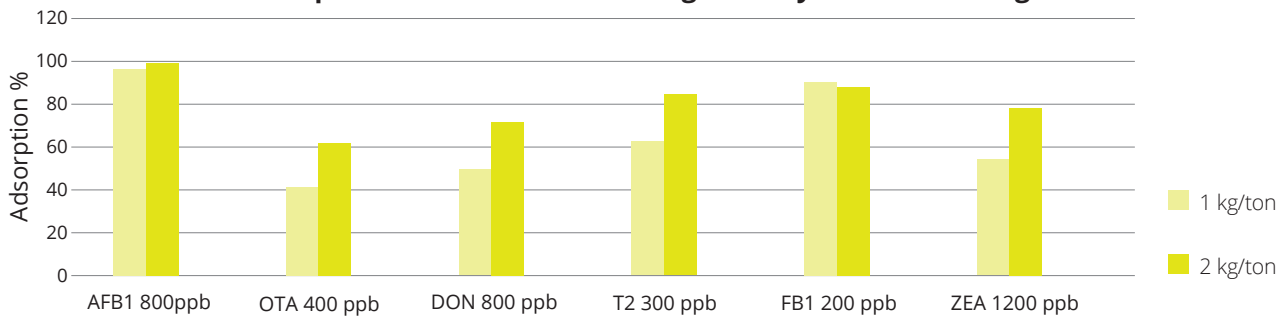

Protect animal health and performance

The synergistic combination of ingredients in SOLIS MAX acts by chemi- and physi-sorption to prevent fungal toxic metabolites from damaging the animals' gastrointestinal tract and entering the blood stream. Consequently SOLIS MAX protects the health and productivity of poultry, swine, dairy and other production animals.

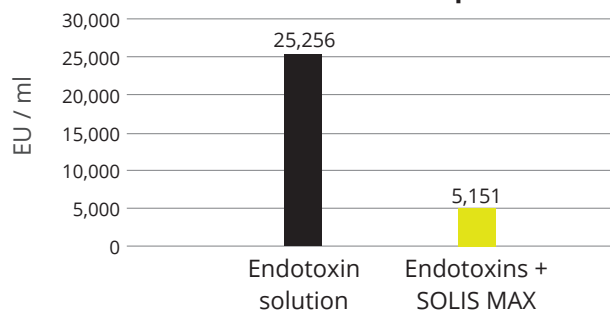

How it works

Dose-response effect of SOLIS MAX against mycotoxin challenges

Endotoxin adsorption

Your benefits

- » Broad spectrum mycotoxin protection
- » High endotoxin adsorption performance
- » Supports the productive performance of animals
- » Prevents the risk of mycotoxicosis
